

ROBERTS'
"Mephisto"
ADOLPHS

For All Soils & Purposes

MOST EFFICIENT

BEST FOR DURABILITY

E. & H. ROBERTS, LIMITED, have been manufacturers of Ploughs for upwards of eighty years, during the whole of which time their motto has been "progress." Long and costly trials and experiments have been made in order to produce Ploughs to suit modern requirements and conditions, and to enable agriculturists to perform their work with the greatest efficiency and in the most economical manner. E. & H. R.'s Ploughs are now known in all parts of the world, and have a reputation second to none, the best proof of this being found in the increasing demand season after season

* * *

The word "**MEPHISTO**" and other marks used by them are registered Trade Marks, and anyone supplying or making Fittings bearing these Trade Marks are liable to prosecution.

* * *

It is strongly urged that all Shares and Wearing Parts should be obtained direct from the Makers, or from any of their recognised Agents, and that same should bear their name—no others being genuine. By doing this our friends may be assured of having their Fittings of the best quality and of accurate fit, the importance of which cannot be over estimated.

TERMS, Etc.

WHILST using every endeavour to despatch goods as promptly as possible, all orders are accepted by E. & H. ROBERTS, LTD., on the distinct understanding that they are not to be liable in any way for any delay which may occur in the execution of the same, notwithstanding any promises of delivery which are given in good faith, and must be accepted as approximate only. Delivery to the Carriers must be accepted as delivery to the purchaser whether the carriage is paid by E. & H. ROBERTS or not, and no countermands can be accepted after goods have left our Works.

In every instance purchasers must carefully examine and check all goods before signing the Railway Company's delivery sheet, and if any damage or shortage is discovered such must be notified. If an unexamined signature is given any shortage or damage must be reported both to the Railway Co. and to us within two days of the receipt of the goods. If these details are not observed, E. & H. ROBERTS, LTD., will not be responsible for any loss or damage.

Goods damaged should be returned at once to E. & H. ROBERTS, LTD., WOLVERTON STATION, L. & N.W. Railway, plainly labelled with the sender's address and "carriage free, damaged in transit, to be replaced."

First orders should always be accompanied by a remittance, or satisfactory references.

TELEGRAMS: "Roberts, Deanshanger."

TELEPHONE: 23, Stony Stratford.

CODE: 5th Edition A B C.

ROBERTS'

Original Champion Ploughs.

THESE Ploughs are made in different sizes to suit all soils, and have gained many prizes at important ploughing competitions throughout the world.

If with Flat Coulter, 4/9 less.

These Ploughs may be had with Draught Rod at the option of the purchaser, at the same prices.

ROBERTS'

'Mephisto' TR 40B Match Plough

THE "MEPHISTO" TR 40B MATCH PLOUGH, illustrated above, has been specially designed under the supervision of expert ploughmen, and after most extensive trials in all parts of the Kingdom. We claim it to be the most perfect Match Plough yet made, and this has been proved most convincingly by the great successes it has gained in open competitions against all other leading makers.

Skim Coulter, 6/6 extra.

If with round (instead of flat) Knife Coulter, 6/- extra.

Seamer with two curved blades, 6/- extra.

For other extras, see page 11.

"Mephisto" 106L and 106 Ploughs are similar to the "Mephisto" 104 and 105 respectively, but are made to take steel shares for rocky land.

ROBERTS' FIRST PRIZE MATCH PLOUGH

"Mephisto" 201.

THE "Mephisto" 201 Plough, as illustrated above, has been specially designed to produce very high cut work, and has gained several First Prizes in severe competitive trials. It is fitted with a special dog-legged Knife Coulter so that the cut can be adjusted to suit all requirements. It has found great favour in many parts where very high cut furrows are in favour.

PRICE.

"Mephisto" 201, with special dog-legged Knife Coulter, for 2 to 4 horses ; furrow, 9 ins. x 12 ins.; weight, 3 cwt.

Swing		One Wheel		Two Wheels
£6 15 0	...	£6 17 6	...	£7 5 0

ROBERTS'
NEW DIGGING PLOUGH
"Mephisto" 207.

WE have designed and constructed this Plough on the general lines of our famous LDX pattern, which has enjoyed a remarkable popularity and sale in all parts. The Breast is of the same shape and turn and as fitted to our LDX Plough, but the Share is divided into three parts as shown, which effects considerable economy in wearing parts, as either the Point, Wing or Socket can be replaced independently without the expense of having a new Share complete, as with the old pattern.

PRICE.

"Mephisto" 207, with skim coulter and flat tail-piece.

One Wheel	Two Wheels
£5 12 6	£6 2 6

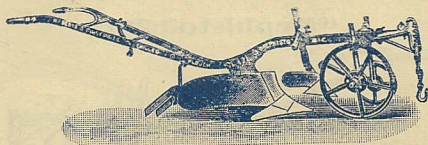

Knife Coulter, 6/- extra. Double-cutting tail-piece instead of flat ditto, 2/6 extra.

General Purpose Body, with Steel Breast, marked GO, 43/3 extra

We can supply a special Body made on the same lines as the above, but to fit our LDX Plough Beam.

The mark of this Body is "Mephisto" 208, and price 36/-

Roberts' Improved "Steel Chilled" Digging Ploughs

THESE Ploughs have no equal for ploughing stubble or lea, or skimming and burying weeds, also for ploughing in manure. The wearing parts are chilled and of the highest grade possible. A general purpose body, also potato raising parts, can be supplied to fit this Plough.

Mark	Weight	One Wheel		Two Wheels	
"MEPHISTO" DIGL 200—					
2 cwt. 0 qr. 0 lbs. ...		£5	5 0 ...	£5	12 6
"MEPHISTO" DIG 200—

"MEPHISTO" DIG 204—					
2 cwt. 1 qr. 14 lbs. ..		6	0 0 ..	6	10 0

These Ploughs are supplied with Breasts for very deep ploughing, if required, at 2/6 extra.

Double Tailpiece (instead of single) with either two straight or two curved blades, 2/6 extra.

Knife Coulter, 6/- extra.

General Purpose Body with Steel Breast, DIGTR 43/8 extra.

Ridging Body, 39/6 extra.

Potato Share with front raisers, 30/- extra

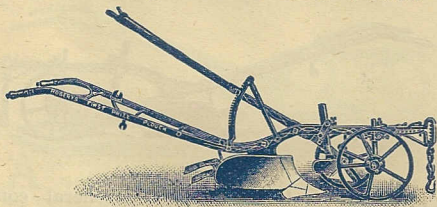

Hind Prongs to ditto, 12/- extra.

Lifting Lever to Land Wheel, see page 17

ROBERTS'

"Steel Chilled" Digging Plough

With Lifting Lever to Land Wheel.

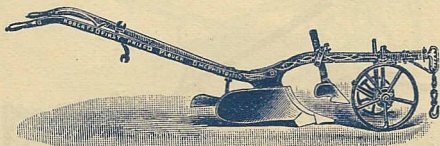

SHOWN above is our "Mephisto" DIG 200 Plough, as described on the preceding page, but fitted with a lever to the land wheel so that the depth of the ploughing can be regulated whilst the Plough is in work and without stopping the horses. This appliance is extremely useful when ploughing uneven ground, or on very hilly land where it is desired to run empty one way, as by means of it the Plough can easily be lifted out of work. It can also be fitted to other Ploughs as catalogued.

Extra—If supplied with Plough, 19/9.

If for Plough already out, 27/6.

Roberts' Improved "Steel Chilled" Digging Plough

THIS Plough is similar in general construction to our "Mephisto" DIG 200, shown on page 15, but is fitted with breast for doing cleaner work, and is more adapted for lea ploughing.

ROBERTS'

Improved Bar-point Plough.

ALTHOUGH this Plough was specially introduced for Ireland, it is suitable for all parts where stony and rocky land is encountered. Instead of the ordinary share it is fitted with a long steel bar, which is reversible so that when one side is worn it can be turned over and used afresh, whilst the two ends may also be reversed, thus effecting a considerable economy over the ordinary cast-iron wing and point.

PRICES.

ROBERTS' PATENT CHILLED BALANCE PLOUGHS

THESE Ploughs have been so designed that they run solidly in all kinds of soils. By a very simple adjustment the pitch of the shares may be altered as required, whilst the wheels are **dust proof**, and of an improved design. They turn a furrow from 10 ins. to 15 ins. wide, and from 3 ins. to 12 ins. deep, and completely pulverise the soil leaving it ready for immediate sowing.

ROBERTS'

Prize Medal Balance Plough, TRB

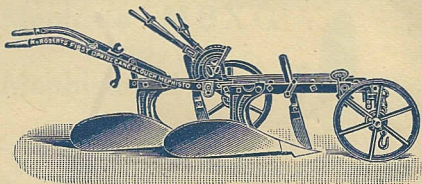

ALTHOUGH light, this Plough is very strong being built chiefly of Steel. It is well within the command of two horses, and is suitable for light and mixed soils. The steering handle enables the ploughman to keep the furrows straight, and by a simple adjustment the shares may be given more or less pitch as required.

ROBERTS' FIRST PRIZE MEDAL 'MEPHISTO' STEEL GANG PLOUGHS

WITH GENERAL PURPOSE BREASTS

THE "MEPHISTO" GANG PLOUGHS have been specially designed to suit the requirements of the British farmer, and are the results of long and costly experiments. They are **built of steel**, which makes them light, yet strong enough for the heaviest soils. They can be furnished with different pattern breasts and shares to suit all soils and purposes, and will be found **great labour-saving implements**. **By their use 45% of the cost of ploughing will be saved!**

The "Mephisto" Gang Ploughs are—

- (1) Designed so that the width of ploughing may be varied from 7 ins. to 12 ins., whilst the depth can be set from 2 ins. to 8 ins. as required.
- (2) The adjusting arrangement is the simplest yet invented, and can be effected in a few seconds by any unskilled labourer.
- (3) The pitch of the shares may be altered by a very simple arrangement, so that the Plough runs smoothly under all conditions.
- (4) The breasts are manufactured of soft centre steel, being tempered by a special process which makes them extremely hard and lasting.
- (5) The great capacity, steady running and turning qualities of the "Mephisto" Gang Ploughs, recommend them to all agriculturists who desire to accomplish a large amount of work in a short time.

If with Swing Buck as well as Hake, 12/- extra.

ROBERTS'
LANCASHIRE AND CHESHIRE
DRILL OR RIDGE PLOUGH,
"Mephisto" L C W.

FOR customers who prefer a Ridging Plough with Wood Beam and Handles, we have designed our "Mephisto" L C W. The Body is of similar design to our "Mephisto" L C, shown on the preceding page. It is light in draught and although low in price is made out of first quality materials.

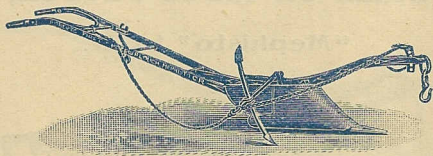

PRICE.

"Mephisto" L C W with			
Hake, or Swing Buck and			
Draught Chain	£5	0	0
Ditto, with one wheel	5	5	0

Marker, 10/9 extra.

If with Swing Buck as well as Hake, 12/- extra.

Roberts' Lancashire & Cheshire Full-Breasted Pattern Drill or Ridge Plough, "Mephisto" C R.

THE wearing parts of this Plough are duplicated and numbered, so that they may be renewed by an ordinary labourer, when required, thus doing away with the expensive method of sending Plough back to the makers to be re-laid. It works exceedingly easy, and with freedom, making a perfect Drill or Ridge.

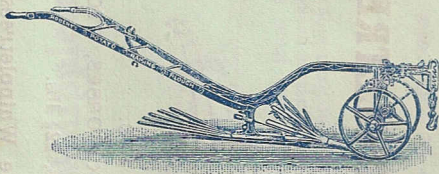

PRICES

"Mephisto" C R, with Hake only. Weight, 1 cwt. 1 qr. 7 lbs.	£	s.	d.
	5	7	6
"Mephisto" C R, with Swing Buck only. Weight, 1 c. 1 q. 7 lb.	5	5	0
"Mephisto" C R, with Hake, Swing Buck, and Draught Chain. Weight, 1 cwt. 1 qr. 7 lb.	6	2	6

Marker, 10/9 extra.

If desired, this Plough may be had with one wheel at 6/- extra.

ROBERTS' POTATO PLOUGH

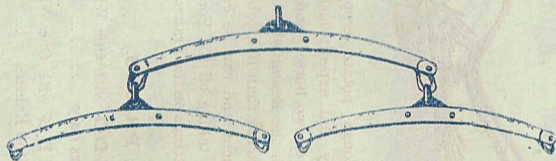

WITH this Plough potato crops can be dug economically and expeditiously. It is well within the capacity of two horses, and there is plenty of clearance beneath the Beam, whilst fewer potatoes will be left in the ground than if dug by hand. It is a most useful Implement and can be converted into a Ridging Plough by taking off the Forks and putting Breasts and other fittings on the Frame.

ROBERTS'
STEEL EQUALIZING WHIPPLETREES.

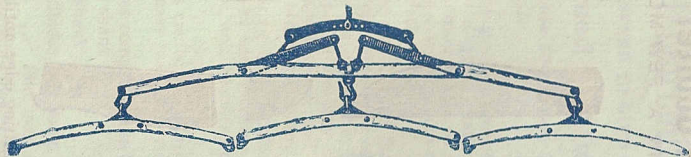

SET FOR TWO HORSES, ETC.
MADE STRONGER FOR FOUR OR SIX HORSES, ETC.

PRICE £1 0 0. Weight, $22\frac{1}{2}$ lbs.

The Lightest, Strongest, and Most Durable Whippletrees Made.

ROBERTS'

3-Horse Steel Equalizing Whippletrees.

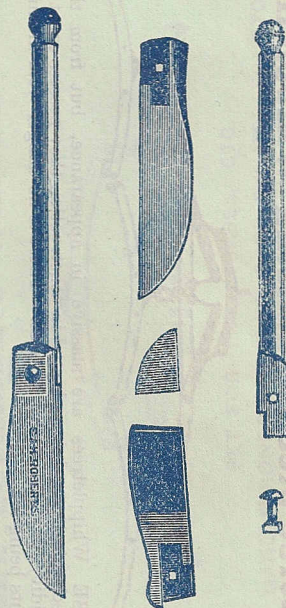

THESE Whippletrees are massive in appearance, but from the sound mechanical principles adapted in construction they possess great strength and rigidity, together with lightness. There is no danger from kicking horses the points being hid.

PRICE £2 0 0. Weight, 57½ lbs.

Number Sold to Date, over 60,000.

ROBERTS'
New Chilled Coulter Blades
RENEWABLE IN A FEW MOMENTS.

Retains a sharp cutting edge until worn out.
Made to fit any Plough, no matter what make.

For full Particulars, see Page 45

ROBERTS'
NEW CHILLED COULTER BLADES

GUARANTEED TO GIVE SATISFACTION.

Once used ! Always used !!

(See Illustration, Page 44).

THE above supplies a want that has long been felt for a **good sharp wearing and easily renewable Coulter Blade**, to obviate the delay and expense of re-sharpening and re-laying the ordinary Coulters by blacksmiths.

The Blades are Chilled (hard as adamant) on the **wearing side**, (see white edge of broken Coulter Blade shown in preceding illustration), and of ordinary temper on the other surface, **so that they wear themselves sharp**, and not to a blunt round edge like the ordinary Coulter.

When ordering these Coulters it is necessary to say what make and number of Plough they are required to fit, and whether **round or flat shank** is required.

Old shanks can be altered to fit the above Coulter Blades—(an easy task for any ordinary blacksmith).

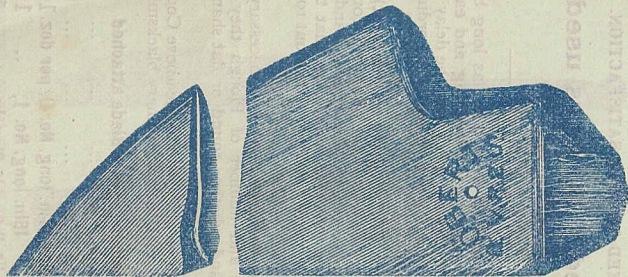

Price of Coulter complete, with Blade attached

to round shank	7/-
Ditto, to flat shank	6/3
Spare Chilled Blades, 14in. long, No. 0,	per doz.	12/9			
„ „ „ 16in. long, No. 1,	„	13/9			
DC 7, for "Mephisto" Double Ploughs,	„	12/-			

 50 PER CENT. IS SAVED BY USING THESE COULTERS

ROBERTS' NOTED SUPERIOR CHILLED SHARES

ARE UNEQUALLED FOR WEARING QUALITY.

PARTICULAR attention is paid to the Shares manufactured by E. & H. ROBERTS and for which they have obtained such a wide-spread reputation. They are as hard as adamant on the under surface, in fact, so hard as to resist a file, and of ordinary temper on the top, consequently they never wear blunt and out of hold of land, as the ordinary common cast shares do, but invariably wear off on the top side only, and to a sharp cutting edge right up to the socket.

When broken, the white hard under surface is seen same as shown by the white line in illustration.

N.B.—A good and well-chilled Share will wear out two or three of common make and is, therefore, much the most economical if even a higher price is paid for it, to say nothing of the Plough running so much better and steadier with a properly made and fitting Share on.
